

PIYUSH JHA

Cybersecurity Enthusiast | Software Developer | Agile Developer | System Security

📞 +91-9717 099088 | ✉️ piyushjha1625@gmail.com | 🌐 piyushjha0852 | 📺 piyush-jha-16

PROFESSIONAL SUMMARY

Software developer specializing in secure backend systems and Android applications. Built full-stack phishing detection platform and OWASP Top 10 learning environment. Proven ability to deliver scalable APIs and reduce code complexity by 20% in production environments.

EDUCATION

Jaypee University of Engineering and Technology

Bachelor of Technology in Computer Science Engineering – CGPA: 8.5/10.0

Guna, Madhya Pradesh

July 2023 – May 2027

TECHNICAL SKILLS

Cybersecurity: OWASP Top 10, Secure Coding, Hashing (bcrypt), Encryption, Vulnerability Assessment

Tools & Software: Android Studio, Git, GitHub, Firebase Studio, PowerShell, Linux

Backend & APIs: Flask, Flask API, REST APIs, Authentication & Authorization

Languages: C/C++, Python, Java, JavaScript

Cloud/Databases: MySQL, SQLite3, Google Cloud, Firebase

Development Practices: Agile/Scrum, Secure SDLC, Code Optimization, Debugging

PROFESSIONAL EXPERIENCE

Technical Intern (Android Developer)

Consilio Intelligence Research Lab

May 2025 – August 2025

Noida, Uttar Pradesh (Hybrid)

- Designed, developed, and deployed a **cross-platform Android application** using **Java** and **XML**, integrated with **optimized backend APIs** for scalable performance.
- Implemented and consumed secure RESTful APIs with authentication and input validation to enable real-time data synchronization, improving application responsiveness by 20%.
- Worked within an **Agile/Scrum development environment**, collaborating in sprint cycles to identify and resolve **multi-device compatibility and debugging issues**.
- Improved **code maintainability and performance** by implementing **modular architecture**, reducing overall **code complexity by 20%** through refactoring and optimization.

PROJECTS

Email Phishing Detection System | *Python, Flask, RAG, RESTful APIs, JavaScript*

[LINK](#)

- Built a full-stack phishing detection application using Python (Flask), JavaScript, HTML5, and CSS3, leveraging **rule-based heuristics**, pattern matching, and **RESTful APIs**.
- Implemented email security analysis including **SPF/DKIM validation**, **malicious URL detection**, domain reputation analysis, **header inspection**, and risk scoring for threat classification.
- Developed secure backend features such as **authentication**, **password hashing**, session management, and file upload handling, ensuring data integrity and application security.
- Applied secure software development lifecycle (**SDLC**) **practices**, including **input validation**, secure file handling, and **API-level security controls**.

Secure Stack Academy – OWASP Top 10 | *Cybersecurity, OWASP Top 10, Simulation*

[LINK](#)

- Developed a full-stack **cybersecurity learning platform** implementing **OWASP Top 10 vulnerability** labs using Node.js, Express, SQLite, and JavaScript.
- Designed a dual-mode lab system (**vulnerable vs secure**) enabling real-time code comparison and hands-on ethical hacking practice.
- Implemented authentication, role-based access control, and secure database architecture to simulate real-world vulnerabilities such as **SQL injection**, **broken access control**, and **cryptographic failures**, etc.

CERTIFICATIONS & ACHIEVEMENTS

Certifications: TechA Ethical Hacker (2025) – Infosys | Advanced DSA Expert (2026) – TakeUForward+

Competitive Programming: LeetCode (1600+ rating) | Strong problem-solving in algorithms and data structures

Extracurricular: Joint Secretary, College Literary Wing | Design and Content Head (3×) for the college annual magazine.
